**FEBIN THOMAS M**

**To whomsoever it may concern,**

I am submitting the enclosed resume for consideration of a teaching career opportunity, at your institution, that will enable me to train young minds holistically as I grow and learn as an individual. I have been working as an Associate Consultant at Kaar Technologies, Chennai since June, 2018. I completed my B. Tech in IT from LICET (affiliated to Anna University), Chennai in April, 2018.

Just like an 'action-reaction' phenomenon, I believe that every opportunity that we take to give to the world will allow us to receive something in return too. Sometimes, the returns are manifold and this reality has always encouraged me to keep looking for opportunities to give to the world the best I can. In this context, I believe that an opportunity to teach and enlighten great souls will ensure that I become a better, more professional, and an elevated personality myself. Indeed, what inspires me the most in this direction is the way in which my own teachers, especially in school, posed as ideal role models thereby influencing how I do my duties in my day-to-day life. What impressed and impacted me the most is not just the complexities of Math or the eloquence of English that they taught me but rather the ethical basis, the courtesies, and character development strategies that they gently ensured I practiced so that my life would holistically become a blessing to many. If I have succeeded in many such aspects until now, then it would largely be attributed to their inputs as they understood the seriousness of the impact that individuals like me could have on the world. What they taught me, and hence what I wish to teach when I become a teacher, is how to live gently on this planet as we express our gifts and skills globally. My skill-sets primarily lie in my ability to quickly adapt to new and dynamic setups. I was a sportsperson during my school days when I captained my Basketball team and emerged as the highest run-scorer of my Cricket team. In college, I was the 'Student of the Year', an award given in recognition of overall excellence in academic, co-curricular, and extra-curricular activities, the Student Head of the Innovation Club, the Cultural Secretary and worked on about 15 projects. More recently, during my college days and later, I started delivering lectures, counseling sessions, motivational talks, technical programs, and so on. Besides the specialties of teaching, I am well aware of the challenges that a person like me will have to confront as I am given the responsibility of a multitude of budding minds. I have been through varied experiences throughout my life that have made me realize that personal trials, especially those which directly impact others, have always kept me on my toes. When I look back, I can barely remember a moment when the circumstances that were doomed to cause disruption didn't have a solution that could normalize it. In fact, the more complex the challenge that knocked on my door was, the more powerful was my response to it so much so that today, I believe that no obstacle under the Sun is unbearable to be overcome. The motivation that will always keep me active will be the great fruits that my students will need to bear in a world that is growing to be more and more challenging to many, especially those of us who are less fortunate. My emphasis in my students will be to become morally upright and develop an

exceptional character that makes their livelihood here on Earth very flawless. Teaching is a calling that has always been in the back of my mind right from childhood and your institution offering such a chance to individuals like me is really encouraging. I can guarantee that no other candidate will show the commitment, willingness to learn and grow along with the students, passion, interest, and the ability to bring novel ideas to the table for discussion that I wish to exhibit during my work. Further, I believe that a cultural change and opportunity to learn as I teach will be of esteemed delight to me, which will again boost my morale while I work with the stars of tomorrow.

Though I am shifting from the software industry to a much nobler profession in teaching, you can trust my abilities, as I am known to be a rapid learner with an array of skills that will help me quickly adapt to the working ambiance and thereby achieve the objectives that are expected of me. I hereby acknowledge that all the information furnished above is true to the best of my knowledge and hope to hear back from you in this regard.

**Yours sincerely,**

**Febin Thomas M**
